

.\winope.exe

A command-line tool for resizing and moving windows.

Usage

List All Windows

```
.\winope.exe list
```

List all visible window handles and their titles.

Resize a Window

```
.\winope.exe resize <window_id> <width> <height>
```

Resize a specific window by providing its handle, width, and height.

Move a Window

```
.\winope.exe move <window_id> <x> <y>
```

Move a specific window by providing its handle, x position, and y position.
